Dr. Julie Higle

Dr. Julie Higle comes to USC from The Ohio State University, where she served for more than five years as chair of the Integrated Systems Engineering Department. Previously, she was professor of Systems and Industrial Engineering at the University of Arizona, where she began her career after earning her Ph.D. in Industrial and Operations Engineering at the University of Michigan, Ann Arbor. Her research interests include developing stochastic programming models and algorithmic methods for decision making under uncertainty, with a recent focus in the area of stochastic modeling for health care applications. She serves on the editorial board of Operations Research Letters and is senior vice president for academics for the Institute of Industrial Engineers, the largest professional society in the field.
